Summary

Full Stack Developer with 3 years of experience in full lifecycle web application development and maintenance. Proven track record of reducing order processing time by 70% through automated payment capturing and shipping workflows, and building scalable e-commerce platforms with integrated ERP systems handling 500+ users. Skilled in Vue.js, Laravel, PHP, MySQL, and microservices architecture; known for delivering user-focused applications with healthcare compliance expertise.

Education

University College of Engineering Villupuram

B.E. Computer Science and Engineering

Sep. 2018 – Apr 2022

Villupuram, TamilNadu

Experience

Netaxis IT Solutions (P) Ltd

Junior Full Stack Developer

Feb 2023 – May 2025

Chennai, TamilNadu

- Developed and maintained robust web applications using PHP with the Laravel framework, ensuring that our codebases were scalable and easy to maintain, which contributed to increased project efficiency.
- Designed and implemented interactive frontends with JavaScript, jQuery, and AngularJS, which enhanced the overall user experience and made our applications more engaging for users.
- Managed and optimized MySQL database architecture, performing database optimization to ensure performance, scalability, and reliable support for growing application demands.

Praba's VCare Health Clinic Pvt LTD

Full Stack Developer

July 2025 – Present

Chennai, TamilNadu

- Developed a full-stack e-commerce platform with integrated ERP system handling 500+ users and 400+ transactions, featuring multi-warehouse management and 150+ inventory items with automated procurement workflows.
- Built scalable microservices architecture using Vue.js frontend with PHP/Laravel backend and MySQL database, implementing role-based access control and real-time data synchronization across multi-organization workflows using REST APIs.
- Created comprehensive admin modules including inward/outward flow tracking, GRN processing, and indent management that streamlined purchasing and processing operations while reducing manual errors.
- Integrated Razorpay payment gateway and Bluedart shipping API with Laravel Jobs and Queues, reducing order processing time by 70% through automated payment capturing, shipping creation, and real-time delivery status updates.
- Led end-to-end deployment and production hosting, configuring DNS records and optimizing application performance to ensure 99.9% uptime and faster page load times while adapting healthcare compliance requirements for prescription-based order verification.

Projects

Sitespedia | *Angular JS, PHP, Laravel*

Sept 2023

- Developed a task management platform that helps users stay organized with intelligent checklists, reminders, and productivity-focused features.
- Designed custom pages using block-based content, enabling users to add notes, tasks, and other elements within flexible sections.

Trichella | *JS, Laravel, Botble*

Aug 2025

- Developed a full-stack e-commerce platform with integrated payment processing and order management features.

Trichella ERP | *Livewire, Laravel, TailwindCss*

Jan 2026

- Built a comprehensive ERP system with multi-warehouse management, inventory tracking, and procurement automation.
